

Every family is special, no matter how they're made or how their little ones come into the world. This book belongs to our family.

WHERE
BABIES
COME
FROM

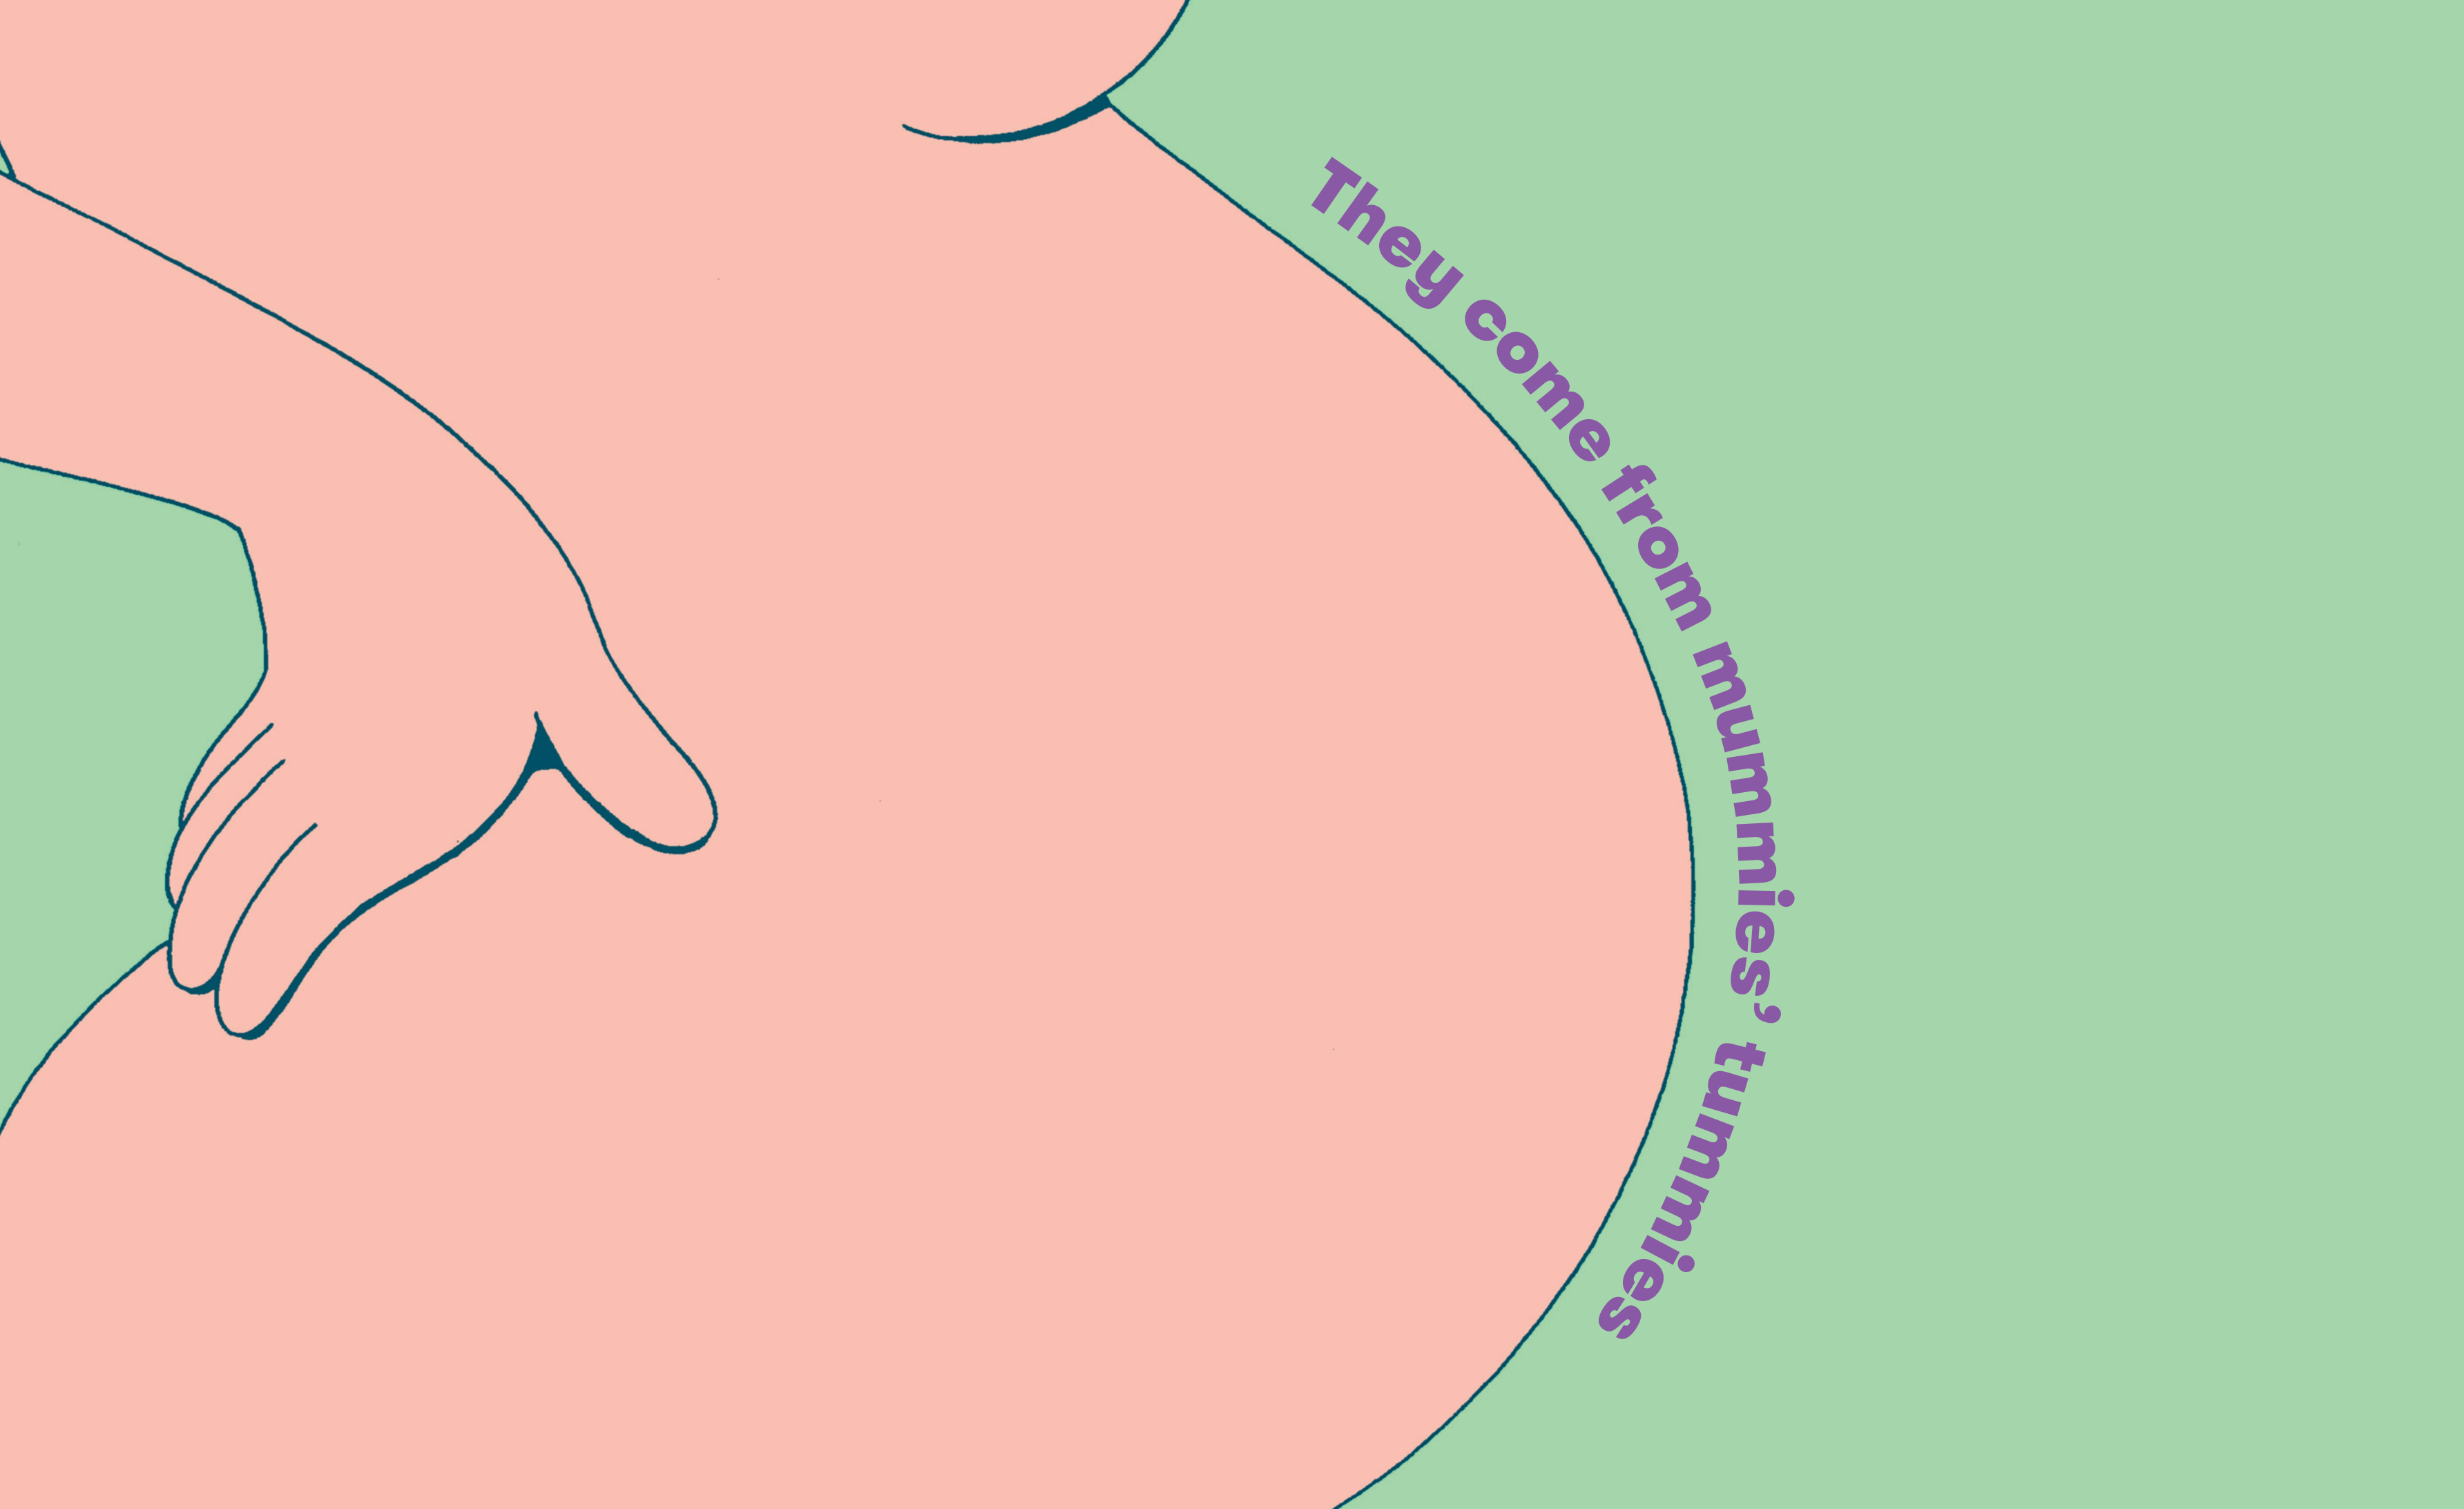

WHERE DO BABIES COME FROM?

You must have wondered where?!

Do they come from
planet Mars?

OR DO YOU
WIN THEM
AT THE FAIR?

They come from mummies' tummies

THAT'S
SOMETHING
WE ALL
KNOW

But how do they get in there

WHERE THEY GROW

GROW

GROW?

For some it's easy peasy

**IT
HAPPENS
WHILE
YOU'RE
ASLEEP**

Mum and dad get very cuddly,
and their bed springs go

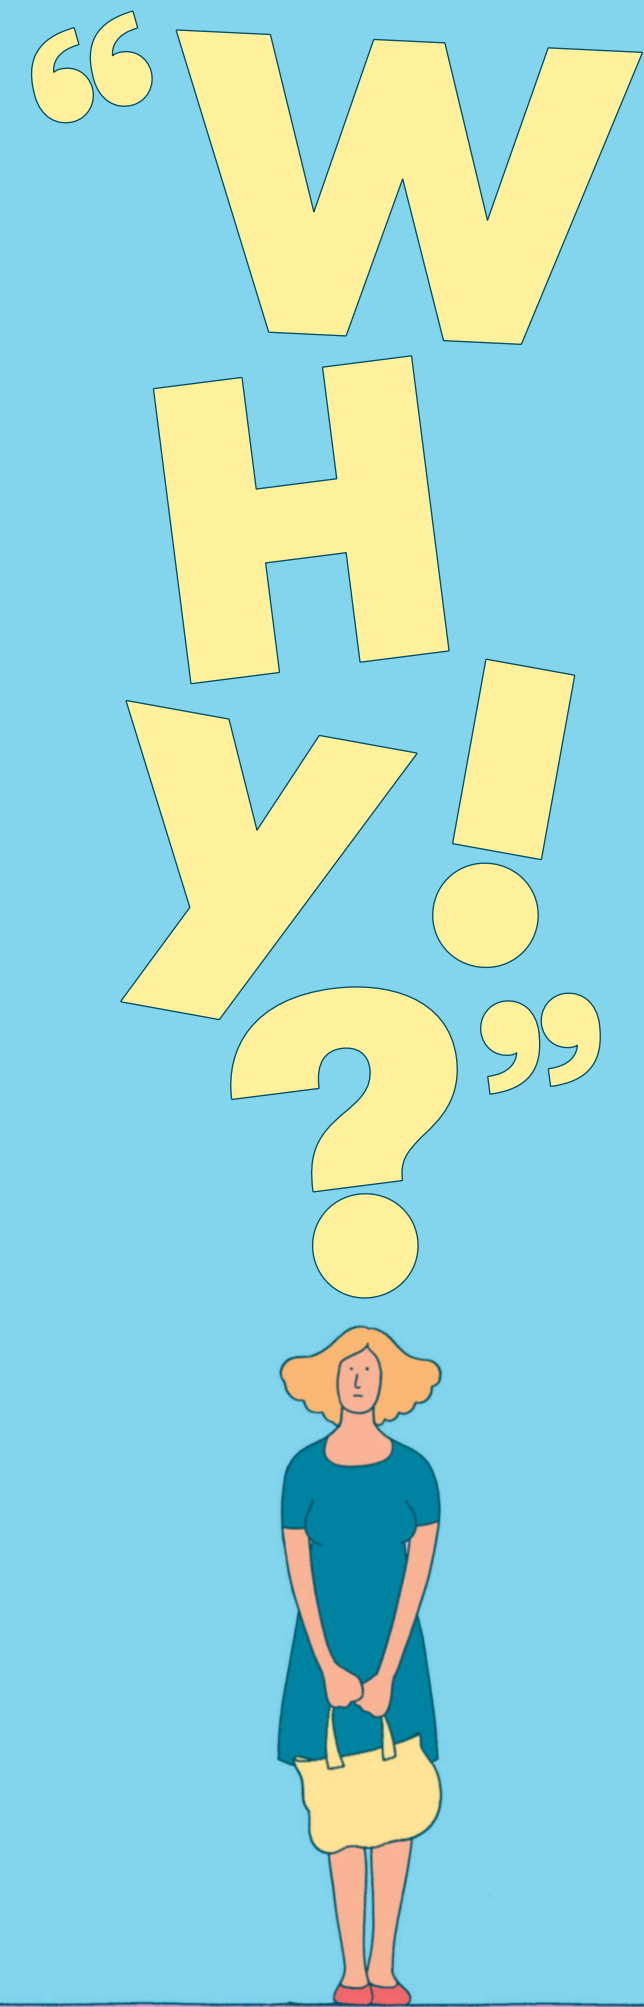

CREAK,
CREAK!

The illustration features four stylized, coiled lines representing bed springs. One is blue and loops around the first 'CREAK,'. Another is pink and loops around the comma. A third is light green and loops around the second 'CREAK!'. The fourth is light blue and loops around the exclamation mark. A purple spring is also visible at the bottom right, looping around the end of the second 'CREAK!'. The background is a dark teal color with small, light yellow dots scattered throughout.

**But for others
it's not so simple**

THEY
~~###~~ TRY
AND ~~###~~
~~|||~~ TRY ~~||~~
AND ~~###~~
~~###~~ TRY

But sadly no baby appears,
and they wistfully wonder,

Sometimes they get really sad,

**A BABY
WOULD MAKE
THEIR WORLD
COMPLETE**

SO THEY
KNUCKLE
DOWN

AND
GO
AGAIN

**Determined to hear
the patter of tiny feet**

It's an even tougher challenge, if they're not

**A MUMMY
DADDY
PAIR**

Like when Sunita's
happily single

OR
CHLOE'S
IN LOVE
WITH
CLAIRE

**They'd give anything
to have a kid**

**It's just their
bodies saying**

NO!

The word "NO!" is rendered in a large, bold, pinkish-red font with a slight 3D effect. The letter 'O' is replaced by a circular sad face emoji with closed, downward-curving eyes and a single blue tear falling from its right eye. The exclamation mark is also in the same pinkish-red color.

But they won't let that stop them,

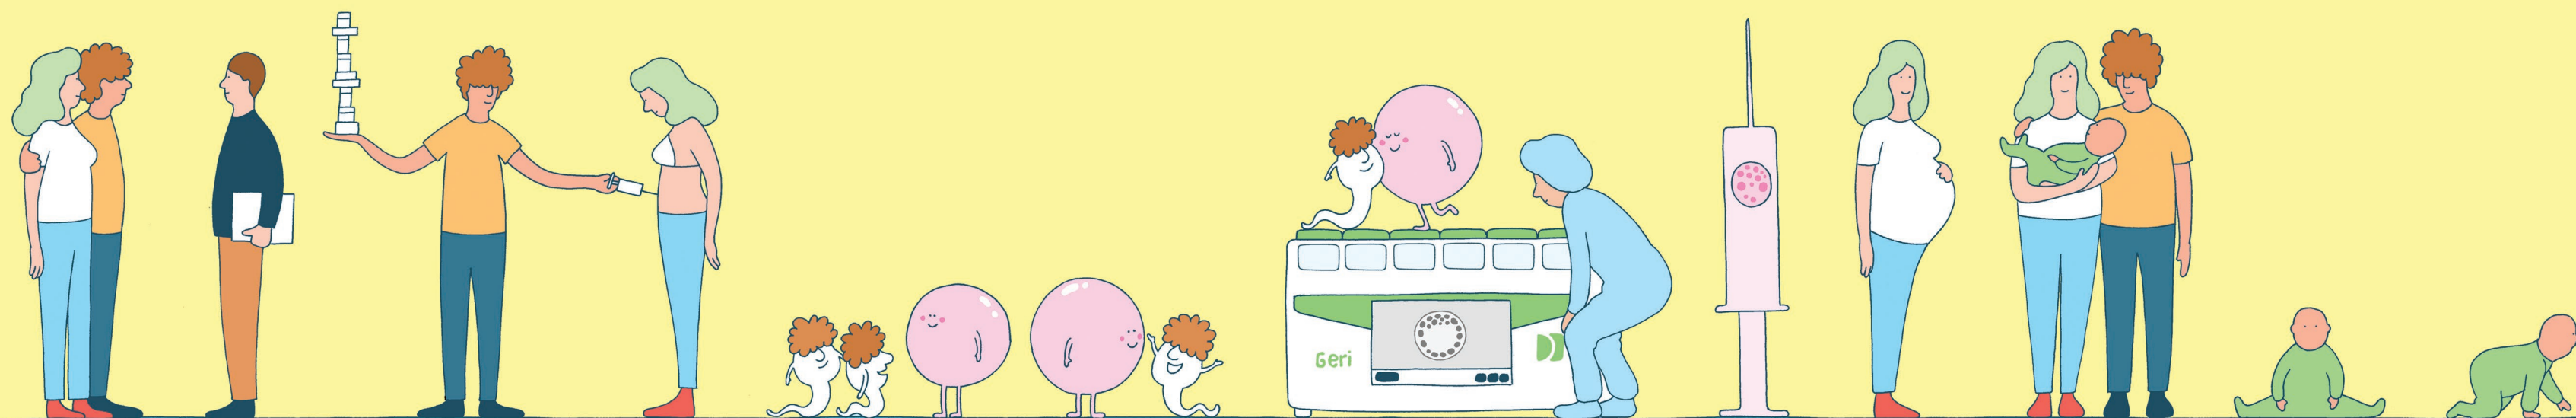

**SO IVF,
HERE WE
GO!**

IVF'S SUPER DUPER COMMON

It helps parents all the time.

The babies turn out perfectly,
no second noses or blue slime.

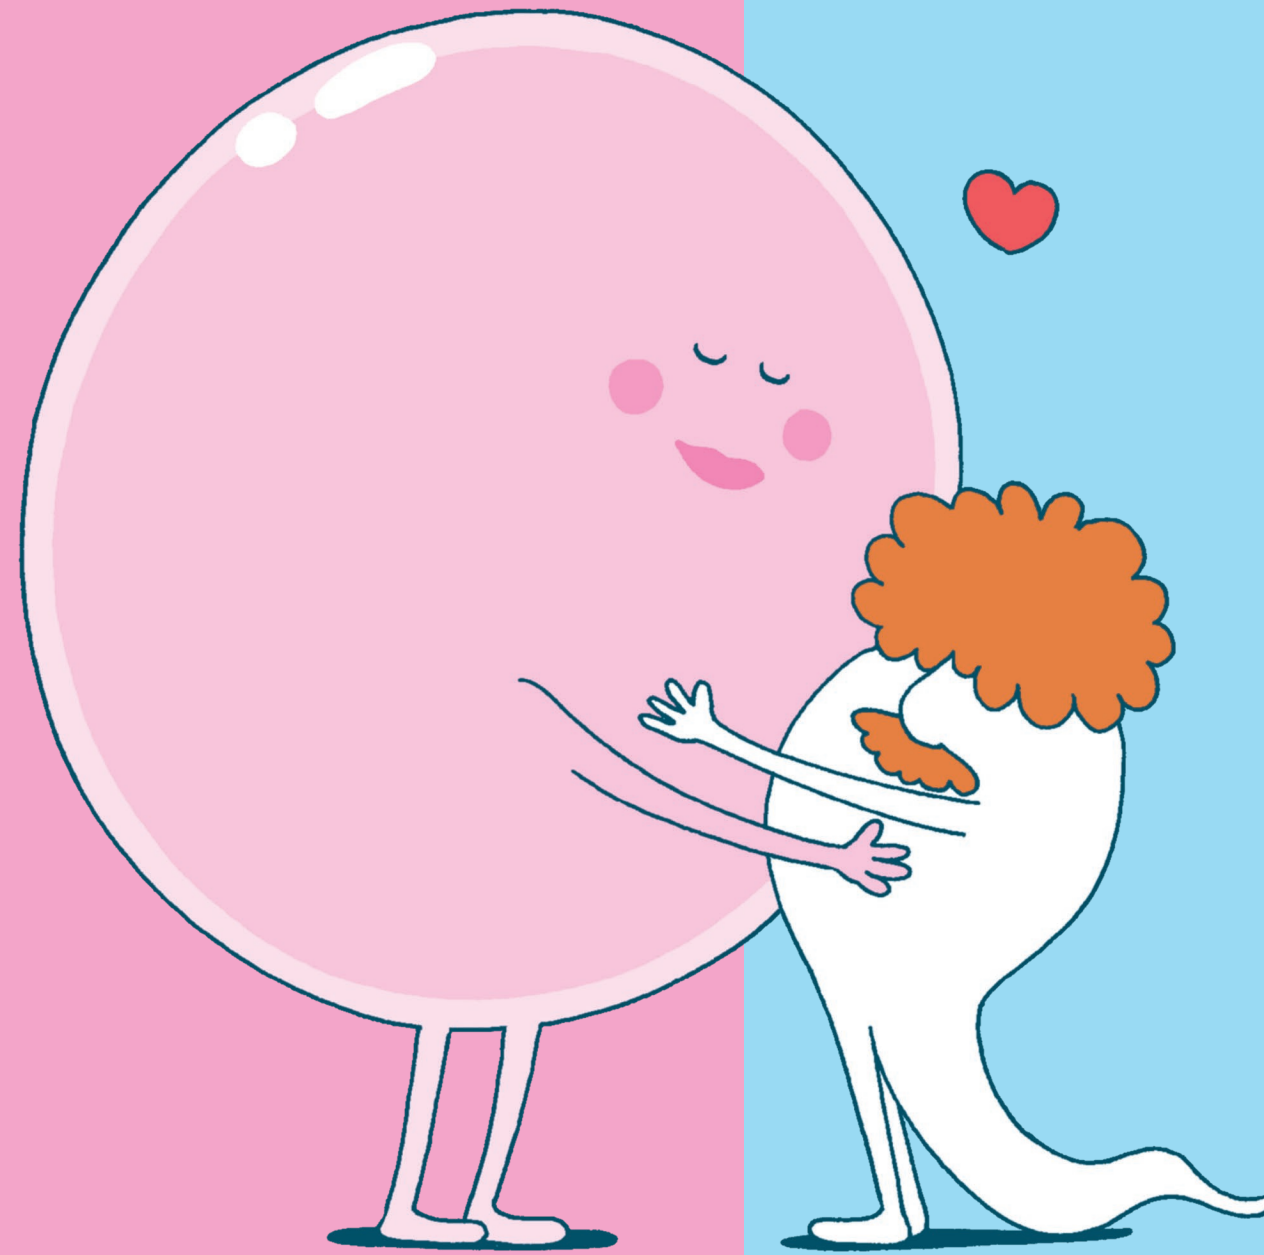

There are millions of babies made like this.

You'll have met more than just a few.

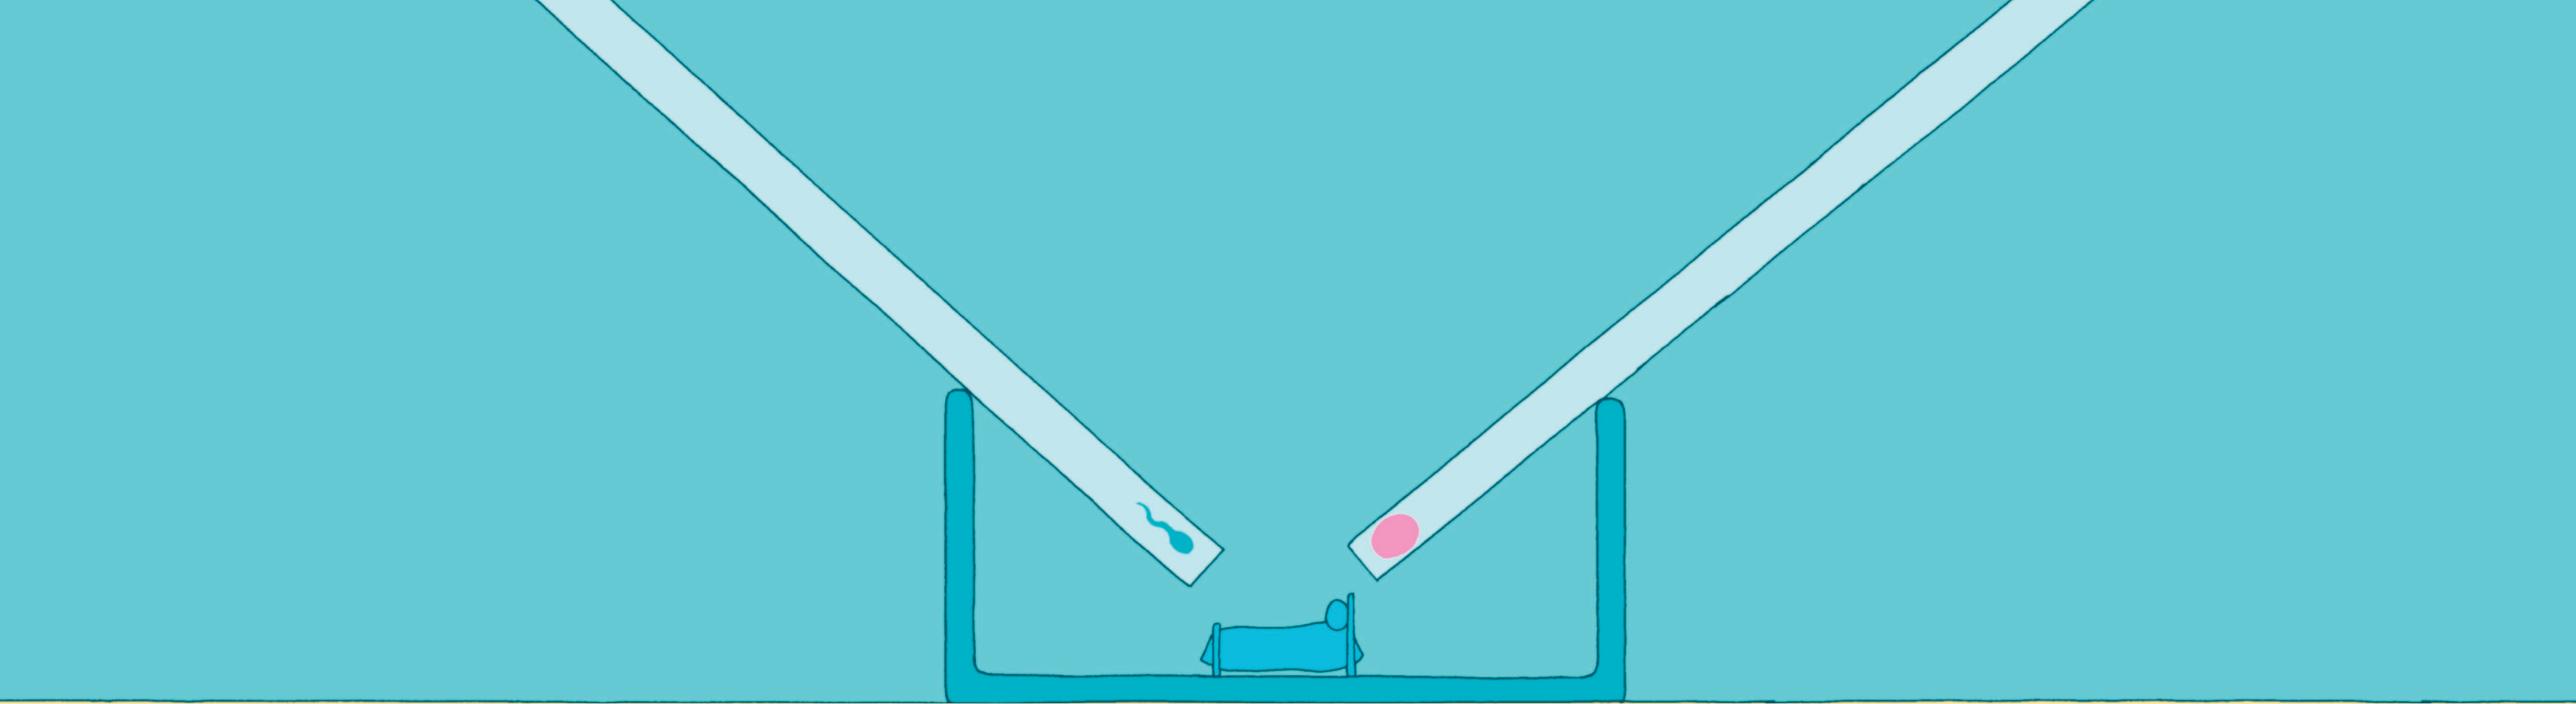

They're in your playgroup, at the park.

They live as far as Timbuctoo!

**It takes a special
bit from a woman**

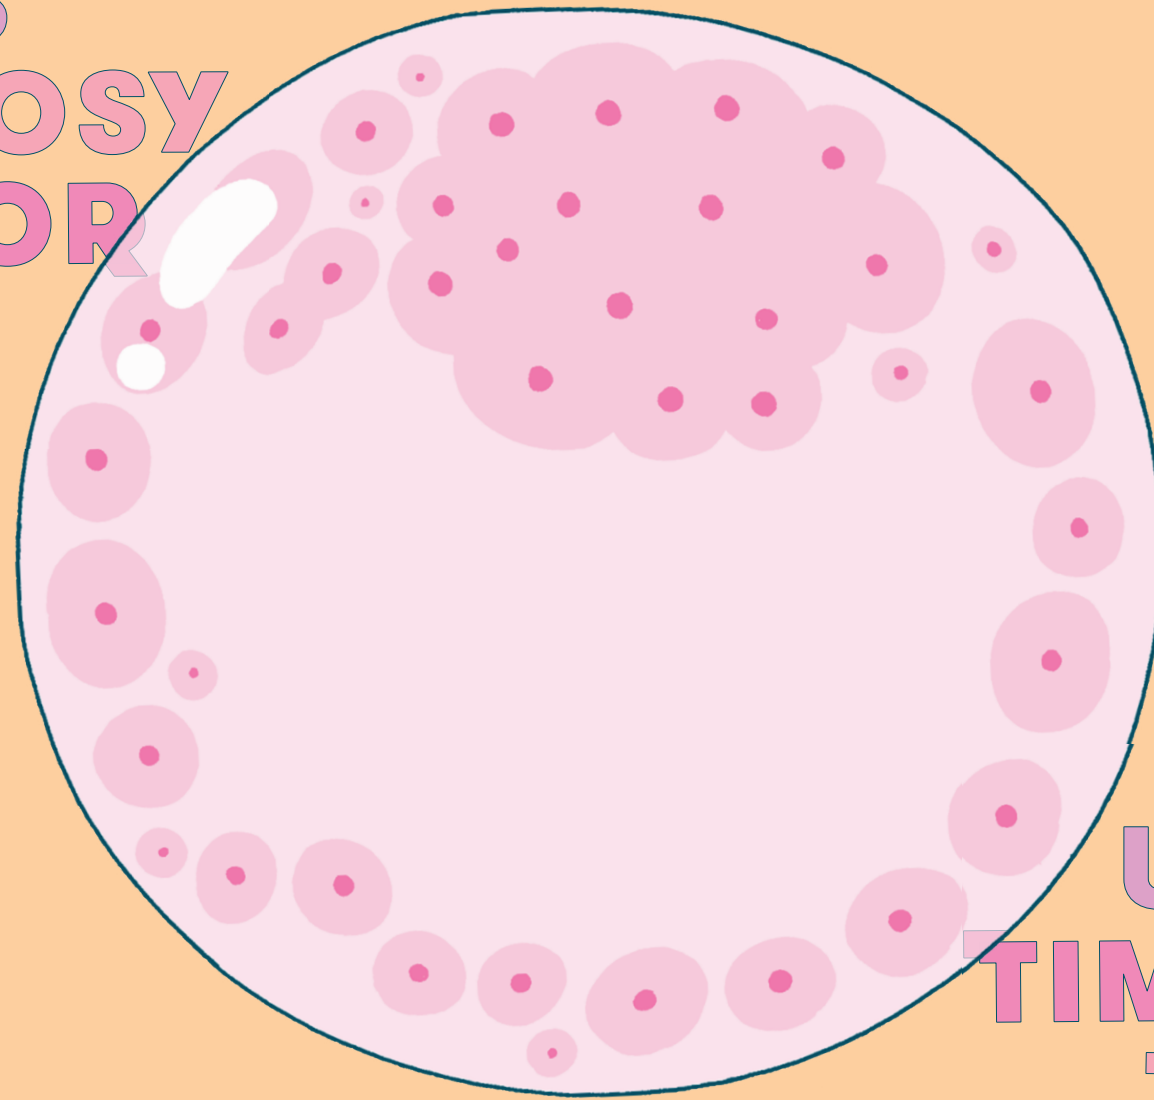

**And a special
bit from a man**

We join them in a laboratory

Technology means
WE CAN!!

IT STAYS
IN A COSY
INCUBATOR

UNTIL THE
TIME IS RIGHT
TO MOVE

We then put bubba in the womb,
where it finds its growing groove.

Ten fingers start to grow,

ten teenie tiny toes.

Their eyes are big as saucers,
and they've certainly got mum's nose!

**PERHAPS
THEY HAVE
A BIRTHMARK**

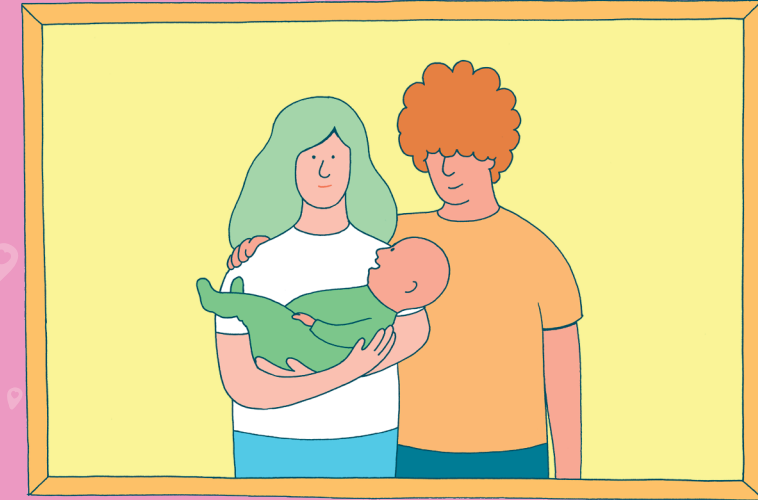

**OR GREAT GREAT
GRANDDAD'S
HAIR**

**THEY'RE BOUND
TO HAVE THE
CUTEST SMILE**

**AND A BABY
SMOOTH
DERRIÈRE!**

Nine months later a baby is born

**WOW
IT GREW
SUPER
FAST!**

It's been a long, tough journey

**BUT
THEY'RE
A FAMILY
AT LAST!**

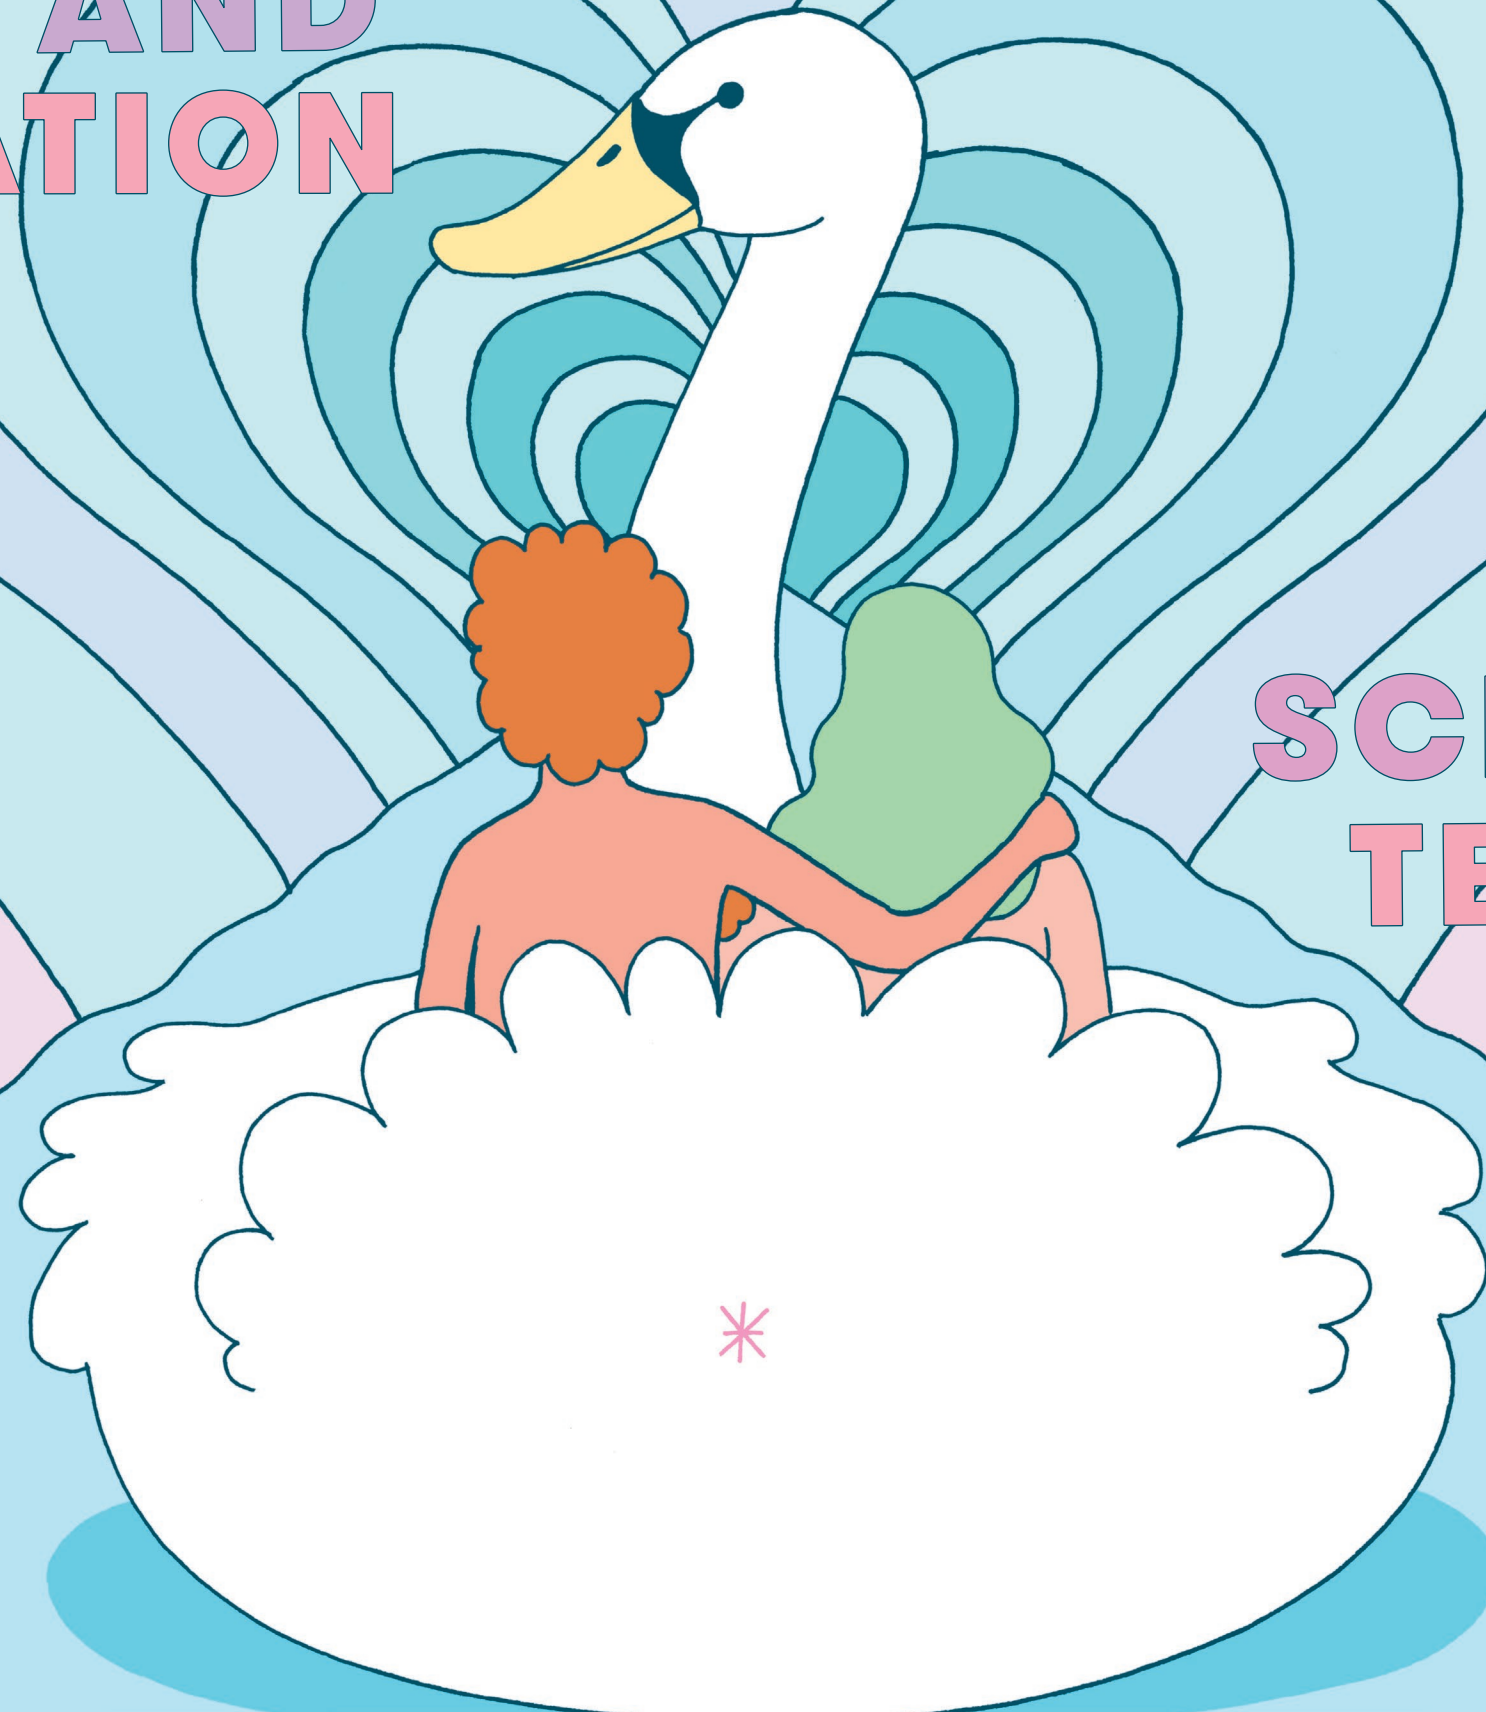

Some people have it easy,
it might've happened first crack.
But after trying so very hard,

IVF KIDS
ARE
LOVED

TO THE
MOON
AND
BACK

IT TAKES
COURAGE AND
DETERMINATION

SCIENCE AND
TECHNOLOGY
TOO

But it's certainly more than worth it,

**TO HAVE A CHILD,
JUST LIKE**

YOU!

THAT'S WHERE BABIES COME FROM

The story lesser told.

But now you know the amazing truth,
it's one that never gets old.
